Safety Facts

- ✓ **OSHA 1910.151** States that Adequate First Aid Supplies shall be Readily Available
- ✓ OSHA refers employers to **ANSI Z308.1** as guidance for the Minimum Requirements for First Aid
- ✓ **OSHA 1910.1030** Establishes **BloodBorne Pathogen Requirements:** 1488277 and 1488278 Cabinets include **BBP**
- ✓ “Mouth-to-Mouth Barrier” must be **510K** device

- ✓ First Aid Kits no longer designated by “Number of Persons” that it will serve. Class A for **Common** Work Injuries and Class B for **High Risk** Injuries
- ✓ Eye Wash is a Snap-Off Top to Prevent Cross-Contamination
- ✓ Cold Compress Instantly Activates and Lasts for 20 Minutes
- ✓ Class A and Class B kits are Gasketed and Weather Resistant

Medical Breakthrough Facts:

- Powder + Pressure = Instant Scab
- The topical powder stops bleeding in seconds by forming an instant scab when applied to the wound
- WoundSeal is unique in that it works independently of the body's blood clotting cascade to create the scab
- The powder has passed numerous clinical studies, including one from the U.S. Department of Defense
- WoundSeal Powder is composed of a hydrophilic, or water-loving, polymer and potassium ferrate
- When the powder is poured onto a bleeding wound, the hydrophilic polymer instantly dehydrates the blood by absorbing only the plasma or liquid portion of the blood stacking the blood solids beneath the powder. Simultaneously, the potassium ferrate dissolves, releasing iron that agglomerates (binds together) the blood solids to create an occlusive seal
- As manual pressure is applied to the powder, the seal is pushed into contact with the wound. The natural glue-like nature of drying blood adheres the seal to the wound and surrounding skin. The occlusive seal, that has formed in seconds, stops further bleeding or oozing. Blood solids continue to stack beneath the seal, strengthening it. The natural clotting process proceeds below the seal

WoundSeal®

Kent I48836I

SAM[®] SPLINT

- The SAM[®] Splint is universal. It can be used to splint any part of the body
- Lightweight (4 oz. for 4.25" x 36" splint)
- Waterproof
- Easy to use
- Radiolucent. You can x-ray through it
- Foam padded for comfort
- Easily rolled or folded for storage
- Reusable. Easily cleaned and disinfected with normal cleaning solutions
- Not affected by ambient temperature extremes or altitude. It even works underwater
- Cuts easily with regular scissors
- Fastens in place with tape or wrap. No extra equipment is required
- Will not puncture

SAM[®] Splint User Guide Book is available upon request

Sam[®] Splint - 36"

Kent I488368

EloVate - 6/Box

Kent I48936I

Relevance in the workplace:

- ✓ 1 in 12 Americans are diabetics
- ✓ 1 in 4 seniors are diabetics (55 and over)
- ✓ Low blood sugar happens anytime, anyplace, 1 billion per year in USA – and that's just what PWDs claim they're aware of...it likely much higher.
- ✓ This is a liability in the workplace and has an impact on productivity. Lows can be fatal.

Product highlights

- ✓ Speed: There's not a faster and more convenient way to get glucose into the bloodstream than EloVate 15 quick-dissolve powder right into the mouth – unless you're getting a dextrose push intravenously.
- ✓ 15/15: It follows the guidelines supported by the American Diabetes Association to use 15 grams of glucose. So highlight 15 grams.

YOU TRUST US FOR YOUR AUTOMOTIVE SERVICE AND REPAIR NEEDS LET US BE YOUR SOURCE FOR SAFETY

Kent Automotive offers safety solutions that keep employees and facilities safe and compliant with regulatory standards. Count on your Kent Representative to recommend the right products for your needs and manage your inventory of safety products so you'll always have the proper equipment on-hand and available for use.

Our full line of safety products includes:

Facility Safety

- Flammable Storage
- Sorbents & Spill Control
- Matting
- First Aid
- Signs & Identification

Personal Safety Equipment

- Safety Glasses
- Hard Hats
- Ear Plugs
- Gloves
- Protective Clothing
- Respiratory
