

BODY HARDWARE

BODY HARDWARE & SOLUTIONS

How many individual products and parts do you stock in your shop? Hundreds? Thousands?

When you're dealing with those kinds of numbers and day-in, day-out work orders, it's easy to misplace stock, mismanage inventory — and miss out on recovering all your costs. Kent Automotive will outfit your operation with the right selection of products, profit-enhancing tools and storage strategies needed to improve your bottom line, reduce cycle time and maximize efficiency. It's what we do every day.

Not every shop is the same — and Kent Automotive gets that.

Choose from our 10,000+ selection of quality body hardware products for domestic and imports, from clips to bulbs, cable ties to screws. We'll help choose pre-packed or customized assortments based on your shop's specific usage patterns.

Profit-enhancing software

What if you could maximize gross profit on every repair? You'd see a serious impact on your profitability. Our cost-recovery software tool, PROS (Product Reimbursement Operating System) allows you to easily track and charge for all consumable product used on a repair. Plus, PROS can generate the type of detail-rich reports and supplemental invoices that you use every day.

- Arrange for complimentary PROS installation and PROS employee training at your convenience
- Track profitability by item, technician or work order
- Print your own barcode labels for products, customers, technicians and work orders to automate data entry
- USB barcode scanner available — increases accuracy and data entry speed

Effective inventory management, guaranteed.

Kent Automotive's Balanced Inventory Service Program helps you maintain the right level and type of stock in your shop. No cluttered stockrooms with excess or out-of-date products.

Combine the power of balanced inventory with our custom storage bins and drawers. These tools are critical to lean business practices, they keep the right products always within reach so your technicians can stay focused on the job at hand.
