

AUTO Scribbler

Auto Scribbler Paint Markers

The non-toxic ink is designed for today's modern cars and automotive finishes.

Specially formulated ink does not stain surfaces or leave shadow marks on paints after washing off. Using a specialized polyester blended tip, it absorbs and releases ink via an engineered spring system. Will not scratch any surface and provides a measured flow-of-ink for a smooth, leak-free writing process.

- Water-based paint marker designed for automotive applications
- Safe to use on rubber, alloys, headlight lenses, plastic bumpers, metal panels and glass
- Easy to wash off using soap or alcohol-based cleaner
- Advanced non-scratching 1.8mm synthetic marker tip
- Fast-drying and weather resistant ink
- Light weight and durable
