

Ure-Foam™ Expandable Foam - Acoustical Automotive Sound Deadening

Control Vehicle Noise, Vibration, Water and Air Leaks

Ure-Foam™ is the perfect solution for many automotive applications and can be used on any vehicle.

Use Ure-Foam™ to:

- Eliminate noise vibrations and panel flutter
- Block air leaks and seal water leaks often found in hard to reach areas
- Eliminate oil-canning of door skins, hood/deck lids, roof panels, rear quarter assemblies and sail panels

With Ure-Foam™ you can:

- Duplicate OEM sound deadening on sheet metal
- Conform to irregular shapes
- Prevent rust with a no moisture solution
- Provide a product that is paintable
- Protect technicians-100% solids, no VOC's, solvent fumes
- Reduce waste with convenient job size packages

Available in Kits or Handy Job Size Packages
